St. Mary's Indian Church Complex The St. Mary's Indian Church Complex is a historic church on Church Street in St. Mary's, Arizona, United States. It is a three-part complex of a cruciform church building with church, school and convent, completed in 1895. The original building was designed by the Phoenix architect W.H. Weeks in 1892 and completed in 1895. It was built as a mission of the newly created Missionary Sisters of the Visitation. The next building on the site was built in 1911 as a hospital for the pupils and missionaries of the Catholic school. In 1930, the present building was built for the convent, as a replacement of the 1911 building. The convent was built of concrete for its asbestos-filled concrete shell. The buildings were designed by Phoenix architect J. Tom Layton in a Mission Revival style. The church is the oldest Catholic Church in Arizona. The original wooden sanctuary was destroyed by a fire on December 24, 1947, but was soon replaced by a new church with a similar exterior, but with frescoes of the Miraculous Medal by artist Nicholas Crispino. The extension of the school building on the site was added in 1949. The school was closed in 1957 and the convent was closed in 1978. The school building was later converted to a residence, and the convent was acquired by the Church of the Sacred Heart, a short distance away. The complex was listed on the National Register of Historic Places in 1995. The school is a contributing property, while the remaining buildings on the site are noncontributing.
